

Pathways Pilot Study

“At Ease Reset Listening Protocols”

At Pathways we believe Veterans have already proven they have the right stuff. Having chosen to serve their country and protect our way of life they deserve more than our respect and gratitude, they deserve our support during their reintegration back into civilian life.

Support at Pathways looks more like a hand up instead of a hand out. We provide more than a road map to avoid the pit falls during transition into civilian life, we provide relief from the symptoms of anxiety, stress and insomnia.

We are not medical professionals, therapists nor do we give advice. What we provide is a safe environment where veterans can have the experience of being heard and are given access to the latest in sound listening protocols to enhance piece of mind.

Thank you.
